

Raj Goel, CISSP, is an IT and information security expert with over 20 years of experience developing security solutions for the banking, financial services, health care, and pharmaceutical industries. A well-known authority on regulations and compliance issues, Raj has presented at information security conferences across the USA and Canada. He is a regular speaker on PCI-DSS, HIPAA, Sarbanes-Oxley, and other technology and business issues, and he has addressed a diverse audience of technologists, policy-makers, front-line workers, and corporate executives. Raj works with Small-to-Medium Businesses (SMBs 10-200 employees) to grow their revenues & profitability. He also works with hospitals and regional medical centers across the north east (NY, Vermont, New Hampshire, Maine, and Pennsylvania) in helping them meet HIPAA compliance requirements and utilizing Health Information Systems (HIS) effectively.
